DEFRA (Ref: MO43) For Weather Forecast Planning Issued on Friday, 12 February 2021 at 05:45 local time

Air Quality Forecast for the UK

Issued by the Met Office

Today: Low levels of air pollution are expected, with brisk and strengthening winds helping to prevent any pollutants from building up.

Tomorrow: Low levels of air pollution are forecast to persist across much of the UK on Saturday. There is the low chance of an isolated pocket of Moderate developing across Shetland.

Outlook: The change to milder Atlantic-sourced air, along with occasionally strong winds will ensure air pollution levels remain mostly Low. Perhaps isolated pockets of Moderate developing across the far north.
